ABSTRACT

This document is comprised of the one issue in volume 6 of "Bridges," a publication produced by the California Head Start-State Collaboration Office to detail the activities of the educational partnership and to provide relevant information to programs participating in the partnership. The Summer 2001 issue focuses on providing practitioners with resources to assist in professional development. The issue presents the Professional Growth and Development Resource Matrix, including narrative descriptions and contact information for various agencies, programs, and associations that provide opportunities for professional growth. The child development permit and renewal process is also described. Information is provided on professional associations, including area sections and local chapters. In addition, contact information is listed by county for child and families commissions, local planning councils, local quality consortia, offices of education, and resource and referral agencies. The issue also delineates regional resources, including child development training consortia and universities and colleges. California's compensation and retention initiative is described and the services provided by regional resources centers delineated. The dilemma of whether family child care providers are legally viewed as employees or independent contractors when they partner with a Head Start agency is also discussed. (KB)

CALIFORNIA HEAD START-STATE COLLABORATION OFFICE

Message from the California Head Start-State Collaboration Office

by Michael Silver, Director, and Michael Zito, Coordinator

n Bridges we try to link you to resources we believe may assist you in providing the highest quality, coordinated, and comprehensive services you can to the families you serve. Recent issues have focused on providing resources for serving children with social-emotional difficulties; gaining access to low- or no-cost health insurance for families; navigating the system of services for children with developmental challenges; and sharing ideas for how agencies can work together to provide families with the full-day services they increasingly need. This issue is focused on providing you with resources to assist in your professional development-whether you are already in the field or are considering a career in early education.

As you probably know, one of the biggest challenges to improving the quality of early care and education programs is the recruitment and retention of well-qualified teaching staff. According to the National Education Association, "How children learn and are cared for before entering kindergarten makes a huge difference in how well they perform in school." But early child education is one of the lowest paid professions in the country. And that fact has a direct impact on the quality of early education programs because qualified, experienced staff seek higher paid positions in kindergar $oldsymbol{\zeta}_{\scriptscriptstyle i}$ ten-through-grade-twelve classes or

Although the staff of *Bridges* cannot solve the wage problem, we can alert you to other resources, some financial, to assist with the professional growth, development, and retention of early education providers. To do this, we are

pleased to provide in this issue "The Professional Growth and Development Resource Matrix." The matrix, developed by the Child Development Training Consortium in cooperation

with the California Head Start–State Collaboration Office (CHSSCO) and the California Head Start Association, has a wealth of information intended to provide you as early care and education teachers, administrators, and others with tools to enhance your professional and personal development. We hope you find it useful.

Other articles deal with the California Early Care and Education Employee Compensation and Retention Initiative, regional resource centers, family child care homes linked to Head Start, local planning area partnerships, and a message from the California Head Start Association.

News from the California Head Start Association

reetings from the California Head Start Association! We are pleased this issue of *Bridges* is dedicated to the topic of professional development. As agencies from Yreka to El Cajon expand their services, the challenge to "grow" a professional, well-trained staff remains critical as we seek to retain the high standards for our children and families in Head Start.

The California Head Start Association (CHSA) is dedicated to supporting the development of Head Start professionals. Our most recent conference in Oakland provided a number of learning opportunities for a wide variety of staff and parents involved in the delivery of Head Start programs. In addition, CHSA is pleased to be working this year in partnership with Development Associates/Quality Improvement Center (QIC) to expand the training for programs on the "Head

Start Child Outcomes Framework," issued by the Head Start Bureau, and on the state's Desired Results outcomebased system.

Over the past few months, CHSA has hosted roundtable discussions on Head Start collaboration in partnership with CHSSCO and Development Associates/QIC. Four meetings have been held around the state to dialogue with the field on the state of program collaboration and partnerships. Based on the results of these meetings, CHSA will produce a fact sheet for use in policy development, expansion of

Professional Growth and Development Resource Matrix

arly care and education professionals in California often have difficulty finding training and educational opportunities and resources to assist them in their professional growth. To provide a needed resource, the Child Development Training Consortium, in collaboration with the California Head Start–State

Collaboration Office and the California Head Start Association, developed

the "Professional Growth and Development Resource Matrix."

This Resource Matrix includes narrative descriptions and contact information for various agencies, programs, and associations that provide opportunities for a person to continue his or her professional growth. The narratives are taken from the Web site or printed brochure or handouts of the programs or services and are presented without official endorsement.

The Child Development Permit Matrix included here was developed by the California Commission on Teacher Credentialing. The Permit Matrix is recognized throughout California as a process that individuals can use to establish a clear career path for professional growth. Each of the six levels of the Permit Matrix requires specific education and experience or alternative qualifications (see the Child Development Permit Matrix—with alternative qualification options indicated).

Since the implementation of the Permit Matrix in 1997, thousands of early care and education professionals have obtained their initial permit and have upgraded to a higher permit level as they have grown professionally. The renewal process for the Child Development Permit and the system of matching position levels in agencies, programs, and associations to the levels indicated in the Permit Matrix are also discussed.

Every effort was made to include as many resources as possible. The omission of an agency, program, or resource is because its existence is not known to the authors or because the information was not available prior to publication.

It is hoped that the Resource Matrix will be a beneficial planning tool for all early care and education professionals. For further information contact Cathy De La Mare, Professional Growth

Project Manager, Child Development Training Consortium, at (209) 341-1661; e-mail: <a href="mailto: delamarec@yosemite.cc.ca.us>.

The resource information is organized as follows:

training, and support for the California Head Start community. Meetings were held in Marin, Santa Barbara, Los Angeles, and Riverside Counties.

To ensure continued success we provide our Web site http://www.ca-headstart.org as an easily accessible base of knowledge and a forum for sharing thoughts and ideas. We encourage you to check it regularly and let us know how we are doing. At the site you will find general information and specific items, such as our updated strategic plan developed at the Board's retreat in April 2001. In addition, our site provides links to many other Web sites critical to the Head Start community.

Finally, it is important for all of us to remain up-to-date with proposed changes to the Head Start system. Please keep in close contact with our state office, telephone (916) 444-7760, to hear the latest news from Sacramento as it relates to collaboration, state legislation, and California's involvement in the national Head Start agenda.

"Coming Together"—to foster a unified and strong voice in California for our children, families, and staff.

Sincerely, Raymond Hernandez, CHSA President, 2000-2002

Child Development Permit Matrix and Renewal Process

arly care and education professionals working in Title 5 and ■ other child development centers can take advantage of the child development permits and their inherent career-ladder matrix established by Senate Bill (SB) 1924 of 1996. The child development permits, issued by the California Commission on Teacher Credentialing, provide a career ladder and renewal process for new and existing permit holders. The permit matrix contains six levels of permits: assistant, associate teacher, teacher, master teacher, site supervisor, and program director. An applicant must successfully complete the specific educational and experience requirements to achieve each permit level.

The educational requirements for individual permit levels vary. They may include one class in each of the four general education categories: English/language arts; mathematics and science; social sciences; and humanities and fine arts. Graduation requirements for general education classes must be met. In addition, applicants must complete core courses in child development. The child development courses include child/ human growth and development; child, family, and community, or child and family relations; and programs/ curriculum. All course work must be completed with a grade of C or better to satisfy permit requirements.

The experience requirements for permits also vary. For example, individuals working at the assistant level need no experience, but individuals at the teacher level must have worked with children three or more hours per day for 175 days within the last four years to be eligible for site supervisor status. A site supervisor must work at the site supervisor level for one program year to move into the program director level.

Child development permit holders, with the exception of those at the associate teacher level, must meet the requirements of the five-year profes-

sional growth renewal cycle as stated in the California Commission on Teacher Credentialing's *California Professional Growth Manual for Child Development Permits*. The following statement is found in the Introduction of the manual:

The Commission strongly believes that an educator's professional growth should be guided by goals and priorities that relate to enhanced competence, performance, and effectiveness in the education of students and that it should be planned as cohesive sequences of activities. The Commission also believes that professional educators benefit from a collegial process of consultation regarding their professional goals, priorities, and needs. Such collegial consultation should be available for educators when they conceive and develop their professional growth plans. Individuals who must complete professional growth activities for the renewal of their permit should consult with colleagues who qualify as advisors for help with the development of growth goals, priorities, and plans on an ongoing basis.

The commission recognizes the importance of collegial consultation and encourages permit applicants to seek the advice of colleagues and professional growth advisors.

The renewal process applies to child development permits issued after February 1, 1997. With the exception of associate teachers, permit holders must do the following during the five-year renewal cycle:

- 1. Obtain and read the requirements stated in the *California Professional Growth Manual for Child Development Permits*. The manual is available at no cost by calling the commission at 1-888-921-2682 or e-mailing the commission at <credentials@ctc.ca.gov>.
- Meet with a professional growth advisor to develop professional growth goals and complete the Professional Growth Plan and

- Record found on pages 37 and 38 of the manual. Permit holders can locate a professional growth advisor in their area through the Child Development Training Consortium Web site at http://www.childdevelopment.org.
- 3. With the guidance of the professional growth advisor, choose activities falling within at least two categories listed in Categories of Acceptable Activities for Child Development Permit Holders on pages 13 through 15 of the manual.
- Complete the required 105 clock hours of professional growth and have the hours verified by a professional growth advisor. Finalize the Professional Growth Plan and Record.
- Contact the Child Development Training Consortium at (209) 572-6080 for information on obtaining a permit renewal application and the processing fees.
- 6. Submit the completed permit application for permit renewal.
- 7. Receive the renewed permit and begin the renewal cycle again.

To renew the associate teacher permit, the permit holder must complete an additional 15 semester units satisfying the requirements of the teacher-level permit within the initial five-year period. During the second five-year renewal period, the permit holder will be expected to complete the remaining requirements for the teacher-level permit. Upon completion of these requirements, the associate teacher must apply to upgrade to the teacher level. There is no option for a third issuance of an associate teacher permit.

For more information regarding the renewal process for any level of the child development permit matrix, contact Cathy De La Mare, Professional Growth Project Manager, Child Development Training Consortium, at (209) 341-1661 or by e-mail at <delamarec@yosemite.cc.ca.us>.

Child Development Permit Matrix

(Alternative Qualification Options Are Indicated Where Appropriate)

Permit Title	Education Requirements (Option 1 for all permits)	Experience Requirements (Applies to Option 1 only)	Alternative Qualifications (With option numbers indicated)	Authorizations	Five-Year Renewal Requirements
Child Development (CD) Assistant (optional)	Option 1: 6 units of early childhood education (ECE) or child development (CD)	None	Option 2: Accredited Home Economics and Related Occupations (HERO) program (including regional occupational program [ROP]); or Option 3: California Commission on Teacher Credentialing (CCTC)-approved training	May assist in the instruction of children under the supervision of an associate teacher or higherlevel position	105 hours of professional growth*
CD Associate Teacher	Option 1: 12 units of ECE/CD, including core courses [†]	50 days of 3+ hours per day within 2 years	Option 2: Child Development Associate (CDA) Credential; or Option 3: CCTC-approved training	May provide instruction and supervise assistants	Must complete 15 additional units toward a teacher permit and meet teacher requirements within 10 years
CD Teacher	Option 1: 24 units of ECE/CD, including core courses, plus 16 units of general education (GE) [‡]	175 days of 3+hours per day within 4 years	Option 2: Associate degree or higher in ECE or related field with 3 units of supervised field experience in ECE setting; or Option 3: CCTC-approved training	May provide instruction and supervise assistants, associate teachers, teachers, and aides	105 hours of professional growth*
CD Master Teacher	Option 1: 24 units of ECE/CD, including core courses, plus 16 units of GE, 6 specialization units, and 2 units of adult supervision	350 days of 3+ hours per day within 4 years	Option 2: Bachelor's degree or higher with 12 units of ECE, plus 3 units of supervised field experience in ECE setting; or Option 3: CCTC-approved training	May provide instruction and supervise assistants, associate teachers, teachers, and aides May also serve as coordinator of curriculum and staff development	105 hours of professional growth*
CD Site Supervisor	Option 1: Associate degree (or 60 units) with 24 units of ECE/CD, including core courses, 16 units of GE,‡ 6 units of administration, and 2 units of adult supervision	350 days of 3+ hours per day within 4 years, including at least 100 days of supervising adults	Option 2: Bachelor's degree or higher with 12 units of ECE, plus 3 units of supervised field experience in ECE setting; or Option 3: Administrative services credential [§] with 12 units of ECE, plus 3 units of supervised field experience in ECE setting; or Option 4: Teaching credential with 12 units of ECE, plus 3 units of supervised field experience in ECE setting; or Option 5: CCTC-approved training	May supervise a single-site program, provide instruction, and serve as coordinator of curriculum and staff development	105 hours of professional growth*
CD Program Director	Option 1: Bachelor's degree with 24 units of ECE/CD, including core courses, 6 units of administration, and 2 units of adult supervision	Site supervisor status and one program year of site supervisor experience	Option 2: Admin. credential [§] with 12 units of ECE, plus 3 units of supervised field experience in ECE setting; or Option 3: Teaching credential with 12 units of ECE, plus 3 units of supervised field experience in ECE setting, and 6 units of administration; or Option 4: Master's degree in ECE or child/human development; or Option 5: CCTC-approved training	May supervise a multiple-site program, provide instruction, and serve as coordinator of curriculum and staff development	105 hours of professional growth*

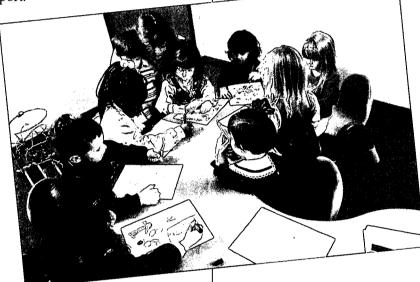

*Professional growth hours must be completed under the guidance of a professional growth advisor. Call (209) 341-1662 for assistance in locating an advisor. *Core courses include child/human growth and development; child, family, and community or child and family relations; and programs/curriculum. *One course in each of four general education categories: English/language arts; mathematics or science; social sciences; humanities and/or fine arts. These classes must meet graduation requirements. *Holders of an administrative services credential may serve as a site supervisor or program director. *Note: All unit requirements must be in *sensester units. All course work must be completed with a grade of C or better. Spanish and Chinese translations of this matrix are available from the Child Development Training Consortium, telephone (209) 341-1661.

Programs and Services

he information on programs and services is arranged in the following categories: Administration, Disabilities, Distance Learning, Family Child Care, Health and Safety, Infant/Toddler, Language and Literacy, Mental Health, School Age, Teacher Training, and Training and Support.

phone number, or both, is provided at the end of each program narrative.

The narratives are taken from the individual program's or service's Web site, printed brochure, or handouts and are offered without official endorsement.

Each resource listed under a category is correlated to the appropriate permit level or levels it may support. Each permit level has been given a number as follows:

- Assistant: 1
- Associate Teacher: 2
- Teacher: 3
- · Master Teacher: 4
- Site Supervisor: 5
- Program Director: 6

The permit level to which the program or service applies is indicated in parenthesis, for example, (2) or (3–6), after the title of the program or service. If a program or service can assist in all levels of the Permit Matrix, the word *All* in parentheses (All) follows the title of the program or service.

The contact information for the individual program or service, which may be a Web site reference, a tele-

Administration

California Early Childhood Mentor Program (3-6)

(See Teacher Training.)

Child Development Training Consortium (CDTC) Administrator Institutes (4–6)

The consortium is a statewide program that addresses the critical shortage of qualified child care workers in the state of California.

The CDTC sponsors a series of twoand three-day Administrator Institutes throughout the state for the professional growth and development of program directors and site supervisors.

The Head Start Management Fellows Program (5-6)

This program awards fellowships to Head Start directors and provides them with a unique opportunity to participate in two weeks of intensive management training. The session is held twice a year at the Anderson School, University of California, Los Angeles (UCLA). During the two-week program the fellows develop an invaluable network that they draw upon long after they return to their own programs. The program's networking value is strengthened through an annual Advanced Management Institute (AMI), a four-day advanced-level training held each winter at UCLA. AMI offers workshops on many topics and a public policy forum to deal with current issues facing the Head Start community.

community/headstart>

Special Education Early Childhood Administrators Project (SEECAP) (4-6)

SEECAP is a project of the San Diego County Office of Education, HOPE Infant Family Support Programs, under a contract with the California Department of Education (CDE). It conducts symposiums in Southern and Northern California to provide leadership training for seasoned and aspiring administrators in early childhood special education and early childhood education, other professionals, and parents in leadership positions. Participants examine controversial and critical issues in infant/toddler and preschool programs and discuss compliance items required by the Individuals with Disabilities Education Act (IDEA) and the California Education Code. The symposium provides a framework for developing creative leadership and sets the standard for cultivating developmentally appropriate initiatives and for administering compliant and inclusive early childhood programs. Follow-up to the symposium is provided at CDE field meetings and is determined by the assessment of participants' needs.

Disabilities

Beginning Together: Caring for Infants and Toddlers with Disabilities and Special Needs in Inclusive Settings (3–6)

Beginning Together is a model for the training of trainers and focuses on the knowledge and skills needed to serve infants and toddlers with disabilities or special needs in inclusive child care and other settings. Beginning Together was developed by the California Institute on Human Services (CIHS) at Sonoma State University in collaboration with the California Department of Education's Child Development Division and WestEd's Center for Child and Family Studies.*

Beginning Together was designed as a follow-up to four modules conducted by WestEd's Program for Infant/ Toddler Caregivers (PITC). All fully certified PITC graduates are welcome to attend. No previous knowledge or training in the area of special needs is required. Participants may include instructors from universities, community colleges, and other educational facilities; representatives from Early Head Start and Head Start, child development centers, resource and referral organizations, teen parent programs, family child care associations, private child care centers, and state departments; and independent consultants.

Three-day institutes are offered once a year. They include regional events in the ten PITC regions, which provide additional early intervention partners in each community.

Sonoma State University, (760) 471-3827 or http://www.sonoma.edu/cihs/BT/Beginning.html>

*WestEd is a nonprofit agency for research, development, and service dedicated to improving education, development, and other opportunities for children, youths, and adults.

Center for Prevention and Early Intervention (All)

The Center for Prevention and Early Intervention provides technical assistance, resources, and support to early care and education providers to promote positive outcomes for children and youths with special needs and their families. Responding to national, state, and local priorities and needs, the center collaborates with health, education, and human service agencies and family support organizations to enhance their capacity to provide comprehensive and well-coordinated specialized services and support. The center's projects are as follows:

- All of Us Together: Moving to Inclusion. This project provides intensive training through statewide institutes to prepare child care providers to serve preschool-aged children with disabilities and other special needs in inclusive child care settings. Teams of early care and education providers, special education and regional center staff, and other related service providers collaborate to develop community plans to better meet the needs of these children. Participants have opportunities to develop new skills, strategies, and resources for inclusive practices. Limited follow-up technical assistance is available to teams that have gone through the training.
- The Community College Paraprofessional Preparation Project. This project provides technical and fiscal support to community college child development programs to infuse early intervention competencies into the curriculum for child development program administrators, child development specialists, and early intervention assistants. A comprehensive curriculum has also been developed for students interested in working with infants, toddlers, and young children with special needs in a variety of settings. An Early Intervention Assistant Certificate program, aligned with early intervention competencies, is being implemented in several community college pilot sites. Articulation with four-year colleges and universities offering Early Intervention Special **Education Credential and Certificate**

- programs and related fields is encouraged.
- Early Start Institutes and Special Topic Trainings. Intensive three-day trainings are offered to early intervention specialists, service coordinators, administrators, and providers of related services. Institutes are conducted in four core areas of early intervention competencies as follows:
 - Supporting the development of infants and toddlers with special needs
 - Meeting the needs of children with specific developmental characteristics
 - -Putting it all together
 - —Service coordinator basic and advanced training

Special trainings and forums are also provided on such topics as assessment and evaluation, natural environments, and family issues.

http://www.wested.org

Head Start Disabilities Services Quality Improvement Center (DS/ QIC)-Sonoma State (All)

The DS/QIC's goal is to help provide quality services to infants, toddlers, and children with disabilities and to serve as a bridge between Head Start–Early Start programs and the disabilities community. To support the inclusion of young children with disabilities and their families in Head Start and Early Head Start programs, the DS/QIC provides training and technical assistance to program staff. Training topics are as follows:

- Head Start program performance standards related to services for children with disabilities
- Development and implementation of interagency agreements
- Legislation and regulations related to early education for children with disabilities
- · Inclusive services
- Service plans for children with disabilities

(Continued on page 37)

Professional Associations

he list that follows contains information about statewide associations for professionals in early child care and education. Each individual association may have local community chapters under its umbrella or may be affiliated with a national association or both. At the end of each narrative is the contact information for the individual program or service; the contact may be a Web site, a telephone number, or both. The narratives are based on the individual association's Web site, printed brochure, or handouts and are offered without official endorsement.

California Association for Family Child Care (CAFCC) (All)

CAFCC's purpose is to provide a viable mechanism at the local, county, state, and national levels that works to meet the child care and development needs of children, their parents, child care providers, and the community. CAFCC provides members with ongoing educational programs and opportunities; coordinates cultural and charitable activities; provides workshops and seminars on nutrition, child care legislation, parenting, and child care for child care and development groups and parents; promotes networking opportunities with other providers throughout the state; and provides technical and research assistance to the child care community. CAFCC's objectives are as follows:

- To promote a continued interest in family licensed child care homes in California as a valid alternative for the care of children
- To coordinate the establishment of licensed family child care homes to help fulfill the needs of the community
- To initiate and encourage programs that relate to the general welfare of children to help further the training

- and education of those programs licensed for family child care
- To communicate with and act as a liaison to licensing agencies to provide a better understanding of the concerns of family child care homes and their rules and regulations
- To inform the membership regarding state and federal policies and regulations relating to the well-being of children in family child care homes
- To review existing and pending legislation and encourage that which may be beneficial to children and family child care homes
- To provide representation on various child care agency boards and on the local child care planning councils throughout the state
- To foster a cooperative effort with community groups for a coordinated approach to community child care needs

<http://www.cafcc.org>

- To work together to advocate the rights and needs of young children and their families
- 2. To support its members in their growth and development as early childhood professionals

Through 47 regional and local chapters in the state, CAEYC offers a number of valuable services. Members have many excellent opportunities to get together and exchange ideas and to cooperate with other groups concerned with the welfare and education of young children. Through sponsored conferences and training programs, CAEYC keeps members abreast of

California Association for the Education of Young Children (CAEYC) (All)

CAEYC is the largest membership organization in California devoted exclusively to promoting excellence in early childhood education. The association's membership includes teachers, administrators, social service workers, family child care providers, students and instructors of early childhood education, parents, and a variety of other individuals interested in the care and education of children from birth through eight years of age. CAEYC's goal is twofold:

emerging trends and issues in early childhood education. Membership in CAEYC includes membership in the National Association for the Education of Young Children (NAEYC). Other services are as follows:

- Annual conference. CAEYC's annual conference features general sessions, workshops, seminars, tours, educational and commercial exhibits, and more.
- Public policy symposium. This annual event provides a unique opportunity for focusing public attention on early childhood regulatory and legislative issues.

(Continued on page 35)

Resource Directories

hese directories are provided to help early care and education professionals at all levels of the permit matrix have access to programs and services. Each program includes the name and telephone number of a person to contact.

Regional Resource Centers to Develop Capacity of Services in Underserved Areas

Regional resource centers in ten regions serve every county in California with resources, assessment, and collaboration; provide outreach to unserved and underserved areas; offer technical assistance and training for agency development; and conduct grant-writing workshops for interested organizations and individuals. For further information contact the center in your region or call:

California's Compensation and Retention Initiative

he 2000-2001 Budget Act allocated \$15,000,000 for a child care employees salary and retention incentive program as specified in Assembly Bill 212 (Chapter 547, Statutes of 2000). The legislation specified that each local child care and development planning council (LPC) shall develop a county plan for the expenditure of these funds, in accordance with guidelines developed by the California Department of Education (CDE), and shall submit the plan to CDE for review and approval before funds may be allocated.

Staffs of the Child
Development Division
of CDE and the State
Children and Families
Commission have
coordinated their work
plans to leverage state
and local dollars to
expand this initiative.

The guidelines were developed in consultation with an advisory group that included sponsors and authors of the bill, LPC representatives, and staffs of Head Start, government control agencies, and the State Children and Families Commission. The funds must be used as an incentive to retain qualified child care employees working in state-subsidized, center-based programs that provide full-day services to children whose families receive state subsidies. Employees of Head Start and State Preschool programs providing such services may qualify to receive

incentive funds if they meet the specific requirements outlined in the county plan.

Staffs of the Child Development Division of CDE and the State Children and Families Commission have coordinated their work plans to leverage state and local dollars to expand this initiative. The State Children and Families Commission has committed up to \$15,000,000 to provide matching funds over the next three years for the Early Care and Education Providers retention incentive programs of local Children and Families Commissions. These funds must be used to pay family child care providers and center-based teaching staff and site directors working with children from birth to five years of age. The final funding round for the three-year pilot project that ends June 30, 2003, was announced April 13, 2001.

Alameda and San Francisco Counties have been pioneers in establishing model compensation and retention plans for qualified employees working in the child care field. A model database system has been developed to:

Expedite applications and process payments.

- Provide a system for tracking recipients and the county's requirements for receiving initiative funds.
- Account for the allocation of funds.
- Support the successful implementation of the county's retention incentive program.

This database project was generously funded by the David and Lucile Packard Foundation, the Quality Child Care Initiative, and KMPT Associates (a software company based in Alameda County). George Phillips, Peyton Nattinger, and Fran Kipnis were members of the talented database development team.

If you are interested in finding out more about these programs, please contact your local Child Care Planning Council or your local Children and Families Commission.

State contacts are:

California Children and Families Commission, (916) 323-0056

Regional Resource Centers

Editors note: The addresses for these Regional Resource Centers are listed on p.23

alifornia's subsidized child care system has expanded enormously since the initial implementation of welfare reform in 1997. However, many areas of the state are still not adequately served. Education Code Section 8289 requires the Department of Education to promote equal access to child development services throughout California. To meet this requirement, the 1999 Budget Act established a sum of \$1.5 million a year for five years (subject to annual appropriation by the Legislature) to develop ten regional centers serving all of California. As stated in the Budget Act, local planning councils (LPC), resource and referral agencies (R&R), community-based nonprofit organizations, and public agencies were eligible to compete for these funds. Allocation of funds to the regions was established with a base amount, plus an additional amount determined according to a region's needs and taking into account resources and the number of unsuccessful applications received from each region in recent funding cycles. In June 2000 ten regional centers, or projects, were funded, including R&Rs, local educational agencies (LEAs), and community-based organizations.

The regional resource centers (RRCs) have a fourfold task. First, the centers work in collaboration with the R&Rs and LPCs in the region and with other related agencies, including those of Native American tribal groups, to assess the resources in a region and to prioritize needs. Second, from the findings of the assessment, the RRC creates a plan for outreach activities in unserved and underserved areas, including rural areas, to identify and recruit new and potential child care and development providers. While the focus of the plan is on underserved rural areas, where child care and development centers have historically been the least successful, the RRC plan addresses the entire state because all California counties have unserved or underserved areas. Third, the centers

are required to implement training and technical assistance activities focusing on the development of new child care and development agencies. Workshops and technical assistance are geared to a full range of development activities to address the particular needs of each applicant. Fourth, the RRCs provide grant-writing workshops to show potential providers how they can prepare successful applications for funding. Grant-writing activities address both public and private resources, including state and federal funds administered by the Child Development Division.

The RRC projects are as diverse as California's regions, and fundamentally different approaches are designed to accomplish the same statewide goal: to promote equal access to child development services.

The RRC projects are as diverse as California's regions, and fundamentally different approaches are designed to accomplish the same statewide goal: to promote equal access to child development services. During the anticipated five-year cycle of the centers, yearly evaluations will shape future activities and document the most effective strategies and structures for accomplishing the scope of the work mandated by this ambitious plan. At stake is the promise of progress toward equal access to child development services for all of California's child care providers, families, and children.

Regions One and Five

The Child Development Policy Institute (CDPI) Education Fund serves two regions in the north and south central coastal counties: Regions One and Five. These regions include the diverse challenges of both urban and rural communities. The CDPI Education Fund provides oversight of local training and technical assistance activities through subcontracts with the R&Rs in the regions' constituent counties. A collaboration with the National Economic Development and Law Center brings the workshop "Maneuvering the Maze: How to Finance the Construction and Renovation of Child Care Facilities" to both regions.

Region Two

In northern California the Shasta County Office of Education serves nine predominantly rural and mountain counties in Region Two. To address the uniquely difficult geographic and demographic challenges of rural mountain counties, staff members from The Grant and Resource Center of Northern California provide workshops offering training in grant writing to potential care providers in each of the region's counties. For more convenient service in the region's remote areas, where a licensing application may require three trips to the closest Community Care Licensing District Office in Chico, the Shasta County Office of Education works with the Licensing Advocates Office to encourage local training opportunities to understand the licensing process.

Region Three

Child Action, Inc., uses a unique approach to the subregions of the ten counties in Region Three, where four geographically and demographically defined service areas are organized across county lines and provide an innovative approach to the delivery of services in the capital region. The project has identified the Tahoe Lake Basin, foothill communities, and valley rural and urban-suburban communities as requiring distinctly different approaches to meet local challenges.

(Continued on page 30)

2

Regional Resource Centers

(Continued from page 29)

Working with multiple programs and projects in the area, including collaboration with Sacramento's Nonprofit Resource Center, the project brings a wealth of expertise to capacity-building activities in the region; for example, the development of new child care centers.

Region Four

In the San Francisco Bay Area, Kid's Clubs, a child care and development agency in Antioch, provides services throughout the seven counties in Region Four. The project has sponsored numerous activities for assessment and training designed to help with agency development in the widely differing communities of the region. Faced with multiple challenges, including serving the state's most densely populated city of San Francisco, the project has prioritized limited resources to target the most compelling needs. Working with Community Care Licensing in the Department of Social Services, the center conducts outreach activities at licensing orientations.

Region Six

In the Central Valley the Stanislaus County Office of Education brings constituents together to focus resources in Region Six to address the needs of population centers surrounding Stockton and Modesto and in remote and rural high Sierra mountain counties. The project has developed an advisory committee structured with bylaws and a carefully crafted framework to represent the region's constituents and interests. The advisory group meets four times a year to consider and decide the priorities for allocating the majority of the region's funds. Workshops and classes are provided in collaboration with the San Joaquin County Office of Education, Regional Office of Grants, Evaluation, and Research.

Region Seven

The Tulare County Superintendent of Schools serves Region Seven, which

has a diverse agricultural economy. A partnership of the R&Rs and LPCs in the five counties was created to focus on working together with established child care advocates and agencies. Monthly meetings are rotated through the five-county service area. Working diligently to address some of the highest statistics of child poverty and unmet child care needs in the state, the partnership has identified local small business centers and other key members of the local business community to coordinate services throughout the region.

Region Eight

Los Angeles County is the only single-county region and has eight service planning areas (SPAs). It is the most populated regional resource center and possibly the most complex, with diverse language, ethnic, and cultural communities. Crystal Stairs, Inc., one of the county's ten R&Rs, has collaborated with the County Administrator's Office to coordinate existing resources and provide a comprehensive plan to address the needs of Region Eight. The project quickly established a series of wellattended workshops to address local Proposition 10 funding opportunities. Future efforts will focus on the county's least densely populated northwest area and on the unique challenges of the urban Native American community.

Region Nine

In Region Nine, the southernmost region of the state, the Chicano Federation of San Diego, a community-based organization that operates child care centers and a family child care network, is bringing together constituents from Orange and Imperial Counties to develop strategies to address the assessment of needs. The project plans a bilingual "virtual center" Web site to transcend traditional barriers of geographic, economic, and cultural isolation and to articulate resources in the region. In addition to a large Hispanic population, the region has

also identified 18 Native American tribal groups.

Region Ten

Serving the largest geographic region of the state, Region Ten, the Riverside County Office of Education works to address the extremely divergent demographics of its urban and suburban population centers and the high Sierra counties to the north. As reported in the 1999 California Child Care Resource and Referral Network Portfolio, the region has two of the counties with the highest needs in California and two counties with the lowest population densities, each presenting its own set of challenges. One focus of the project has been to develop family child care homes to address child care needs in remote regions and to recruit the region's many license-exempt providers to achieve stable, quality licensed care.

Accomplishments of the Centers

During the 2000-01 funding cycle, the Child Development Division has brought the RRCs into the infrastructure of California's child care system. With the release of management bulletins announcing requests for funding applications (RFAs) in December 2000, potential applicants were provided contact information for the RRCs to obtain training and assistance with grant writing. In addition, whenever a score on an application is too low for a program to receive funding, a referral is made to the RRC in the program's area for technical assistance to improve the application for future opportunities. Working with community partners, R&Rs, and LPCs, the RRCs have become a vital part of the state's plan to equalize access to child care and development services in all of California's underserved areas.

For further information, please contact Tom Cole, Consultant, Child Development Division, at (916) 323-3034.

Partnership Issues: Employees or Independent Contractors?

Family Child Care Providers in Networks or Systems or Sponsored by Programs

by Abby Cohen, Region IX, State Technical Assistance, Specialist National Child Care Information Center

n August 29, 2000, the Head Start Bureau issued proposed regulations which formally recognized the provision of Head Start in family child care settings as a program option. Almost from the inception of Head Start, family child care has been discussed as a possible option. Since Head Start's goal is to design programs to meet community and family needs, family child care has always been attractive. Many parents value its convenience, flexibility, homelike features, and ability to mix age groups (and thereby allow siblings to remain together). In response to this demand, a number of Head Start grantees established family child care homes through innovative demonstration grants and program expansions.

Through the demonstration projects the Bureau identified six primary indicators of quality family child care: the use of licensed homes; very small groups of children, especially when infants and toddlers are enrolled; qualified family child care providers with suitable training and experience; the implementation of a curriculum based on sound child development principles; the integral involvement of parents; and the provision of strong support from the Head Start program to providers, including paid staff to assist the family child care provider as needed and ongoing oversight of the family child care provider by qualified and experienced staff.

Ongoing oversight is important because it always raises a fundamental legal issue when considering family child care networks or systems or a

program's sponsorship of homes; namely, are these providers employees or independent contractors? Unless that issue is dealt with, many agencies are reluctant to establish these programs. If providers are found to be employees and have not been treated as such, programs will be hit with penalties for failing to comply with the legal requirements imposed on employers, such as paying unemployment taxes, workers' compensation, and so forth. Consequently, individuals commenting on the proposed regulations have requested that the Head Start Bureau respond to these concerns in its final regulations.

In the meantime this article presents a brief overview of the issues and the current legal landscape. The article first addresses why it even matters how the law characterizes a worker and why the issue is so complicated. Then it discusses the two primary legal issues of concern: (1) Is there an employment relationship? (2) If there is, who is the employer? Finally, it looks at existing case law.

Why does it matter how the law perceives a worker?

When a family child care provider operates completely independently, everyone agrees that the provider is an

independent contractor. But as soon as the provider has a relationship with a sponsoring organization, a network, or other system that supports providers and includes certain requirements or oversight, questions arise about whether or not an employment relationship exists. This issue is important because if an employment relationship does exist, the sponsoring entity or the employee or both may be responsible for complying with a variety of federal laws. Some of the primary requirements are as follows:

- Obtaining an employer identification number
- Complying with the federal Fair Labor Standards Act (FLSA)
- Complying with federal tax provisions, including the Federal Insurance Contributions Act (FICA), otherwise known as Medicare and Social Security
- Complying with the Federal Unemployment Tax Act (FUTA)
- Withholding federal income tax
- Applying for the Earned Income Tax Credit (EITC)
- Completing the Employment Eligibility Verification form (INS Form I-9)

(Continued on page 32)

Partnership Issues: Employees or Independent Contractors?

(Continued from page 31)

Under California law employers and employees have additional responsibilities. The primary requirements under state law are as follows:

- Registering as an employer with the Employment Development Department (EDD)
- Paying employer taxes, including State Unemployment Insurance (UI) and Employment Training Tax (ETT)
- Withholding required payments, including State Disability Insurance (SDI) and Personal Income Tax (PIT)
- · Withholding payroll taxes
- · Withholding income tax
- Contributing to workers' compensation
- Complying with the California Wage and Hour Law

Failure to comply with these laws is costly. In addition to the payment of whatever is owed, many of these laws carry severe civil penalties for violations. Willful violations may also subject one to criminal penalties.

Why is this issue so complicated?

There are three important factors that make the determination of whether there is an employment relationship complicated and difficult. First, many of the legal requirements listed above use different legal standards to determine whether one is an employee or an individual contractor. Although its sounds crazy (and it is not common), it is possible to be considered an employee in one context and an independent contractor in another. For example, courts are more likely to find an individual to be an employee under California's workers' compensation law than under other laws because the primary purpose of the workers' compensation law is to protect injured workers.

Second, the standards that are applied in these cases are not tight, objective standards but, instead, are very loose, subjective determinations. It is also a stretch to call these determinations.

nations "standards" because the "standard" used is really a conglomeration of factors, agency opinions, court interpretations, and so forth.

Finally, whether an administrative agency or court determines that someone is an employee is a highly individualized decision based on the specific facts of that person's case. As a result, it is hard to give generalized guidance or develop rules of thumb. Similar cases have resulted in different outcomes with no apparent justification.

When is there an employment relationship?

As indicated above, differing legal standards are used to determine the existence of an employment relationship, depending on which law is being considered. For example, for the purposes of federal employment tax laws, the Internal Revenue Service (IRS) applies a 20-factor test, whereas the FLSA, which is more expansive (easier to be considered an employee), uses a six-factor test. Regardless of which test is employed, there are some factors that are typically considered. These can be grouped into three areas:

Whether an administrative agency or court determines that someone is an employee is a highly individualized decision based on the specific facts of that person's case.

Behavioral control—the right to direct and control how the worker does the task. This right does not actually have to be exercised for an employment relationship to be found; one must simply have the right to exercise control. Those making the determination look at the instructions the business gives the worker and any training given the worker. This factor is the

most important consideration in almost all legal tests.

Financial control—the right to control the business aspects of the operation. Agencies and courts look at:

- Whether the worker has unreimbursed business expenses
- What the worker's investment is
- The extent to which the worker makes his or her services available in the relevant market
- How the worker is paid
- The extent to which the worker realizes a profit or incurs a loss

Type of relationship. Agencies and courts look at:

- Whether there is a written contract describing the relationship (Although the written word counts for something, it is not determinative.)
- Whether benefits are provided
- The permanency of the relationship
- The extent to which services performed by the worker are a key aspect of the regular business of the company

Who is the employer?

Under some of the employment laws, there may be a finding of joint employment. One of these laws is the FLSA. Therefore, once agencies or courts determine that an employment relationship exists and that the FLSA governs, they must also determine who the employer is. When child care subsidies are paid to family child care providers who are a part of networks or systems, the entities that need to be evaluated for their possible employer status are the payment agency (whether

(Continued on page 33)

^{&#}x27;Versions of this 20-factor test are widely available; one source of value is the IRS Training Materials on worker classification, which is used by IRS employees to determine whether individuals are employees or independent contractors. While the training material does not carry the force of law, it is instructive. It can be obtained electronically at http://www.irs.ustreas.gov/prod/bus_info/training.html.

Partnership Issues: Employees or Independent Contractors?

(Continued from page 32)

public or private), the state or locality, and possibly the parents. In cases of joint employment, all the employers are responsible for ensuring that legal obligations are met.

What are the precedents in case law?

Not surprisingly, few cases deal directly with whether family child care providers that operate as a part of networks or systems are to be considered employees or independent contractors. And, as discussed previously, when such cases exist, it is difficult to generalize from them because either they occur in a different legal context or they involve different facts. The most recent cases in this area have applied the National Labor Relations Act (NLRA—the primary law governing unionizing) to family child care providers who are a part of networks or systems.

Independent contractors have no protection under the NLRA.

The National Labor Relations Board (NLRB), which makes the rulings that implement the provisions of the NLRA, has found at least twice that family child care systems operating in New York were made up of independent family child care providers and that these providers were not employees of the sponsoring agency. In Cardinal McCloskey Children's and

Family Services, 298 NLRB 55 (1990), the providers were found to be independent contractors despite the existence of numerous factors that suggested that they were employees, such as working set hours, serving only referred children, being furnished with toys and equipment, having to attend mandatory training, being closely monitored to ensure compliance with regulations, and having extensive suggestions made regarding the operation of their homes.

The key to this decision appears to be that despite all the monitoring and supervision, the regional director found that most of the monitoring was done according to regulations required by the subsidizing agency rather than by the sponsoring agency. It is interesting to note that this finding was made despite the recognition that the homes received more visits than were required by the subsidizing agency and that providers were required to make alternative arrangements for children in their care in the event of provider illness or vacation and to notify the sponsoring agency, although the subsidizing agency did not require this.

By contrast, a 1980 decision by the NLRB had found that providers *were* employees because they were required to meet many controls imposed by the employer independent of any governmental regulations.

details and see few differences between these providers and child care center staff.

Others are concerned about the cost that a finding of employment would cause, particularly in subsidy situations in which the subsidies provided are insufficient to cover all the costs that accompany employment. Still others believe that providers working in their own homes are too independent to be considered employees, regardless of the requirements they must meet to participate in a network or system. The Head Start Bureau may provide some guidance in the future on these issues with respect to Head Start programs under federal law in response to the comments submitted about its proposed regulations.

However, that still leaves open continuing concerns about how Head

Start programs utilizing the family child care option will be treated under state laws and how family child care networks or systems operating outside of Head Start will be treated under state and federal laws. Because these networks or systems may operate under different standards (unlike Head Start, which uses a uniform standard throughout the country), and the cases may come up in different legal contexts

(unemployment, workers' compensation, etc.), we may continue to get different outcomes. It is important for any network or system considering the development of such a program to obtain legal counsel to review the cases that do exist. In that way programs can develop operating policies and procedures in accordance with the outcome they wish to attain—as employees or as independent contractors.

Conclusion

There are no easy answers to these issues. From a policy perspective, some people are eager to ensure that protective employment laws benefit family child care providers who clearly are not operating on their own. Those taking this position believe that such providers are running businesses that are controlled by others down to the small

Local Planning Council and Head Start Collaboration—One County's Story

by Donna Beveridge Child Care Coordinator San Bernardino Children's Network Child Care Planning Council

In order for California to receive federal child care block grant funds, a process was required to determine local priorities for the use of funds. In California a local planning council (LPC) was established in each county to assess the needs of the community for child care and development services and to set priorities for the expenditure of grant funds (AB 2141).

In response to this requirement, the San Bernardino County superintendent of schools and the county board of supervisors convened a planning council steering committee in June 1991. The steering committee membership included the San Bernardino County Preschool Services Department (PSD) Head Start program. Hortense Hunn was the first Head Start director to serve on the local planning council. The executive director of PSD has been a voting member of the local child care planning council ever since.

In 1994 San Bernardino County received its first allocation of the federal child care block grant. In 1995 the San Bernardino LPC hired a child care coordinator, Donna Beveridge, to develop a strategic plan for managing the county's federal block grant and for cooperating and collaborating with the entire early education community, including the Head Start/Preschool Services Department. A year later the LPC (chaired by a staff member of Child Development Services), Head Start/PSD, the County Office of Education, and Child Development Services drew up a plan for a "wraparound" program: children would receive full-day care throughout the year from federal and state child care programs administered in one location (known as co-located programs).

The federal Head Start program funds one-half day of care, and the

State Preschool program or an alternative payment program funds the other half-day of care. State Superintendent of Public Instruction Delaine Eastin approved a waiver for the plan, which accelerated moving children on waiting lists from one program to the other. In the first year 50 children were served in the Head Start and State Preschool program. The program has been a success and gets additional support from the CalWORKs Child Care Agency's Transitional Aid Department (TAD).

In 1997 the fledgling California Child Care Association invited the San Bernardino LPC chair and the child care coordinator to speak at the association's first conference. Addressing 60 attendees, the conference speakers focused on the role of the local planning council and the collaborative relationship with Head Start. Every year since, the LPC has participated in child care workshops throughout the state on the same topic. In addition, as an appointed community representative to the Head Start parent policy council (PPC), the LPC child care coordinator has disseminated information on child care and development issues to the PPC members and has collaborated on many projects, including the "Stand the Children" celebration the past three years.

When the local planning council was reorganized in 1999, the council's appointed membership included 20 percent child care users and providers, including the president of the Head Start PPC and other interested parents. All these activities served to improve the LPC's relationship with the child care community and strengthened the interaction of the LPC with Head Start.

The Welfare Reform Act of 1996 brought about changes in child care and development services. California's response to the federal law was the establishment of CalWORKs, California's welfare program, which includes cash and employment assistance for eligible families. San Bernar-

dino County's response to the changes brought by welfare reform was to organize a multidisciplinary team in 1999. The team consisted of the LPC coordinator and a representative from each of the following agencies: Head Start; TAD, CalWORKs Child Care Agency; county schools; Pomona Unified School District (PUSD), the agency serving the west end of San Bernardino County; the resource and referral (R&R) agency serving the rest of San Bernardino County; and the community colleges.

The multidisciplinary team met weekly to plan a seamless, cooperative method of moving clients through the stages of public child care into the greater arena. All concerned agencies began using the same administration forms, parent's handbook, and provider contract forms. Except for the community colleges and the PUSD, they ultimately began using a joint server and the same software, NoHo (North Hollywood) Cares. In 2000 a combined eligibility list (CEL) project integrated all state-subsidized providers and children for child care in a joint server. For Head Start/State Preschool, TAD, Child Development Services, and the resource and referral agency, the dream became a reality.

When parents are referred to the Head Start/Preschool Services Department, child care service for their other children is available through the local R&R agency. As children leave the Head Start program, other agencies provide school-age and after-school child care. This collaboration allows children to move from one program to another with no disruption to the family.

Collaboration and cooperation are not just "buzzwords" but a commitment from both the Head Start/ Preschool Services Department and the local planning council, leading to the best service for children and their families.

California Child Development Administrators Association (CCDAA) (5-6)

Recognized as one of California's leading professional organizations, CCDAA is an independent professional organization for administrators of publicly funded child development programs. Its long-standing record of advocating quality early education in California dates back to 1943. CCDAA achieves its purpose of promoting quality early childhood programs in the state through the provision of educational and technical assistance and networking for administrators. The

association provides a forum for administrators to work together to improve the quality, availability, and efficiency of child development programs. It also has an impact on decisions at the state level through its active partnership with the California Department of Education, Child Development Division. Membership benefits are as follows:

- Receive up-to-date information on issues being addressed in Sacramento and Washington, D.C.
- Have access to technical training at the monthly section meetings and the annual conference, which are designed for administrators.

- Have opportunities to network and to discuss and solve problems facing administrators and to support colleagues.
- Become affiliate members of USA Child Care, a national provider organization.

Each of the association's northern section, southern section, and state executive board has monthly meetings. CCDAA holds a state conference and annual membership meeting each year. E-mail: <a href="mailto: lschwa01@lausd.k12.ca.us

California Community College Early Childhood Educators (CCCECE) (All)

This association is for personnel employed in California community colleges with assignments in child development or campus child development centers. Associate membership is offered to persons with teacher-training responsibilities in other agencies. CCCECE's purpose is:

- To communicate and share information among colleagues
- To monitor legislation and commissions affecting children and education
- To speak as a united voice to strengthen the community college and its early childhood/child development and children's programs
- To serve as a liaison with the California Community College Chancellor's Office

Membership benefits include the biannual *Letter Tree* newsletter; public policy action updates; fall and spring workshops or conferences; regional networking meeting for all members; task forces organized to work on teacher preparation and issues involving community colleges' early childhood education programs, instruction, and services; and a professional action grant awarded annually for a project that will benefit the community

college's early childhood education field.

Maureen McSweeney (707) 864-7183

California Head Start Association (CHSA) (All)

Over the years, CHSA has become the unified voice providing leadership and advocacy for the Head Start community. Uniting people from the Head Start programs, parents, and other concerned persons in such a large state has always had its challenges, but the association has constantly worked to overcome them through mailings, conferences, trainings, and other avenues of communication. Membership of the association consists of parents, Head Start staff, community volunteers, and staff of other agencies.

(916) 444-7760 or http://www.ca-headstart.org

The mission of CalSAC is to support professionals and organizations in providing quality, affordable, and accessible school-age programs.

California School Age Consortium (CalSAC) (All)

CalSAC is the nation's oldest and largest statewide association for schoolage care, representing more than 7,000 professionals and allied organizations. The mission of CalSAC is to support professionals and organizations in providing quality, affordable, and accessible school-age programs. To accomplish its mission, CalSAC provides training, advocacy, and networking opportunities for schoolage and after-school care professionals throughout California. The membership reflects the diversity of school-age care and after-school programs and includes practitioners, educators, and advocates who work in a variety of

settings. CalSAC works with statewide policy advisory groups and local community networks, and its advocacy efforts help educate the public about the essential services and benefits of quality programs for children and youths in their out-of-school time.

(415) 957-9775 or http://www.calsac.org

Professional Association for Childhood Education (PACE) (All)

PACE is a nonprofit, tax-exempt organization established in 1955 to advance the profession of providing quality child care and early childhood education. A statewide association, it serves all categories of licensed and regulated child care centers. PACE members operate nearly 1,000 centers serving more than 55,000 California children. The association offers members opportunities for networking and gaining valuable information through local chapter meetings, periodic workshops, professional development training, and legislative updates. Through the PACE state lobbyist, the Department of Social Services Regulatory Committee, and PACE's affiliation with the National Child Care Association, PACE strives to protect the interest of the private provider while promoting continual professional development. Members receive services and support in legislation, licensing regulations, networking, and education; information through The PACESetter, a quarterly newsletter; the annual membership directory; and legislative and regulatory alerts. Other member benefits include discounted rates for child care liability insurance, which includes coverage of student accidents; debt collection services; financial planning services; assistance in handling accounts; continuing education; and entertainment and travel discounts

Distance Learning

California Virtual Campus (CVC) (All)

CVC is a Web site that provides access to a catalog of distance learning courses offered by accredited colleges and universities throughout California and of professional development resources and training offered through CVC centers. Currently, CVC has 124 participating colleges and universities,

3,411 courses, and 165 programs. CVC does not grant degrees or certificates or answer individual questions about courses. Through the CVC Web site, interested participants can find out about courses and certificate or degree programs offered through distance learning by California's leading institutions of higher education and connect with the appropriate campus for enrollment and more information.

<http://www.cvc.edu>

California State University (CSU), Fresno (All)

Fresno State Digital Campus, which is not listed in the California Virtual Campus, has been serving the college community through distance learning for more than 14 years and has been offering an array of Web-based courses for students from all walks of life. These courses, some of which are fully and others partially online, are available anytime and anywhere to anyone interested. The campus also has four main studio-classrooms that are used for broadcasting courses to off-campus students. Through the Internet courses are delivered to programs in other CSU campuses, including Bakersfield, Chico, Humboldt, San Francisco, and Stanislaus.

http://www.csufresno.edu

California State University (CSU), Northridge (All)

CSU Northridge, which is not listed in the California Virtual Campus, offers the Educational Technologies and Distance Learning Services program. As an outreach program, the Distance Learning Services provides quality education to the distant learner. One of its many outreach modes is a fourchannel color network—an interactive audio and closed-circuit system that covers an area of more than 14,000 square miles. It enables the university to establish an electronic network and provide training and education to students in the Antelope and San Fernando Valleys, Kern County, and additional places in Los Angeles

County. The program offers credit classes and noncredit certificate programs transmitted live through microwave from campus classrooms to telecommute centers, schools, and industrial companies. This television network makes it possible for off-campus students to complete undergraduate prerequisites.

<http://www.csun.edu>

Family Child Care

Child Care Initiative Project (All)

The Child Care Initiative Project, established in 1985 to address the shortage of licensed, quality family child care services in California, is conducted by local resource and referral agencies. The five-stage process to build the supply of child care is as follows:

- 1. Assessing the local supply and demand of child care and targeting shortages of care in specific geographic areas
- 2. Recruiting interested individuals who have the potential to become licensed family child care providers
- 3. Training those individuals to provide quality child care and to manage a small business effectively
- Providing technical assistance to help those individuals get licensed and started
- 5. Providing ongoing support to help them stay in operation

Private and local contributions are encouraged to match funds from the California Department of Education, Child Development Division, but there is no specific matching requirement that could act as a barrier to increasing the supply of licensed family child care providers, especially in rural areas and in areas with high concentrations of poverty.

California Child Care Resources and Referral Network, (415) 882-0234

Family Child Care at Its Best Project—University of California, Davis (All)

Offered through the Center for Human Services Training and Development, University of California, Davis (UCD), this project provides training and quality improvement services to licensed family child care home providers throughout California.

Diane Harkins, Project Manager, UCD, (530) 757-8643

Family Child Care Provider Training (All)

This training project was designed for members of local and statewide associations of family child care providers. It supports the training, professional development, and networking of family child care providers to enhance the quality of services provided to families and their children who are using family child care settings. Services provided by the project include regional family child care institutes, grants to local associations for locally determined training activities, and funds to help pay for substitute staff when needed.

Malia Ramler, Center for Health Training, (415) 929-9100

Public Broadcasting Preschool Education Project/Sesame Street Preschool Education Project (PEP) (All)

This project, conducted by seven public television stations in Eureka, Fresno, Los Angeles, San Diego, San Francisco, San Jose, and Redding, trains child care providers in the appropriate use of television as an educational tool for young children and their families. The PEP training program reaches thousands of family child care providers, preschool program staff, parents, and other caregivers of young children. Critical thinking skills and literacy are stressed throughout the workshops. Caregivers receive materials (a provider handbook, training tools, storybooks) that enrich the quality of their program for young children.

Each of the participating public television stations has established a network of trainers to offer continued support and conduct refresher training. The project is jointly funded by the California Department of Education and participating television stations.

Aurora Dominguez, (916) 323-1312

Health and Safety

California Child Care Health Program (CCCHP) (All)

Dedicated to improving the quality of child care by promoting and facilitating the linkages between health and safety services and the child care communities and the families they serve, CCCHP delivers the following services:

- Child Care Health Linkages Project. Funded by the California Children and Families Commission, the project is developing the infrastructure to provide health and safety consultation services to child care programs in an effort to increase healthy outcomes for children and families. Child care health consultants and family health coordinators will be hired and trained in up to 20 counties in California. These health professionals and early childhood educators will work with caregivers and families to ensure healthy and safe environments and practices and access to resources.
- Child Care Health Connections Newsletter. Disseminated statewide, this bimonthly publication provides current and emerging health and safety information to the child care community. Articles may be copied by programs and distributed broadly to service providers and parents.
- Child Care Behavioral Health Project.
 The project expands access to mental health consultation services and provides training for child care and mental health providers in dealing with behavioral issues in child care settings, including working with

- families and managing difficult behavior.
- Diversity Research and Training Project. The project addresses health, developmental, and social issues involving biracial children in child care settings. A curriculum module will be developed for inclusion in diversity training and workshops.
- On-Line Child Care Health. This
 project establishes online health and
 safety bulletin boards and trains
 child care and health care providers
 to use online information and
 services. The focus is on gaining
 electronic access to information
 regarding services in California and
 nationwide.

- Child Care Health and Safety Consultation Services. This program provides health and safety assessment, training, information, and resources to child care centers in San Francisco and other communities where funding may be available.
- Family Child Care Immunization
 Project. Funded by the California
 Department of Health Service,
 Immunization Branch, the project
 notifies and educates family child
 care providers about new immuniza

- tion requirements for children in care and promotes the use of community resources.
- Healthline (800) 333-3212. The
 Healthline provides information and
 consultation on children's health and
 safety issues, including communi cable disease management and
 reporting requirements; immuniza tion; behavioral and nutritional
 concerns; child abuse; children with
 special needs; and early childhood
 education and development. Calls to
 Healthline are answered by pediatric
 health professionals. Referrals to
 health-related services are made
 when necessary.

http://www.childcarehealth.org

California Center for Health Improvement (CCHI) (3-6)

CCHI is a nonprofit, nonpartisan resource for policymakers and community residents seeking to improve the health of the population. It serves the public not only by disseminating objective and accurate information on community health and health care issues and polices but also by framing ideas and research for action. CCHI provides practical guidance, identifies clear policy choices, addresses barriers to effective implementation, and supports public policy innovation at the community, state, and national levels. Since 1995 CCHI has been recognized as a headquarters for health improvement and promising prevention practices. CCHI's core services include:

- Health policy analysis and development.
 CCHI analyzes complex health issues and presents recommendations for future action.
- Program consultation. Consulting expertise is offered in 45 subject areas, including early childhood and youth, health care, outreach for children's health coverage, prevention programs, reorganization of public health programs, tobacco control, substance abuse, women's health, and implementation of the

- California Children and Families First Act.
- Reports and publications. Actionoriented publications stimulate thoughtful dialogue, increased participation, and informed policymaking to improve the health and well-being of the greater community. CCHI publications include Growing Up Well-The Series, Getting Involved, Emerging Infectious Diseases, Supports for Families, and Emotional Health of Children.
- Surveys and tools. CCHI develops and implements public opinion surveys of Californians. Working in collaboration with several agencies, CCHI has gathered numerous findings on community health, health spending, welfare reform, children's health, and substance abuse. Available tools include a handbook on organizational development and guide on the contracts awards process.
- Workshops and training. Interactive training and workshops are offered on such issues as home visitation and family support, organizational development, grant writing, strategic planning, policy development, and data use.
- Proposition 10 Technical Assistance Service Center (TASC). The center helps 58 county Children and Families Commissions in developing and implementing their local strategic plans and achieving their Proposition 10 goals and objectives. This statewide, courtesy technical assistance program is funded by the California Children and Families Association through a grant from the David and Lucile Packard Foundation. TASC responds to counties' direct requests for assistance and to their emerging needs with on-site programming and consulting services based on regular assessments of county needs, surveys conducted at annual statewide meetings, and other feedback tools. A variety of written materials, Web

- site-based information, and telephone consultation services enhance structured program offerings. Examples of services are as follows:
- Coordinated direct technical assistance is provided by expert consultants on-site, through telephone, and through regional workshops in the following areas: organizational management, fiscal planning, grant preparation, The Brown Act, and coordination and integration of services for children.
- The resources library houses information about program-related best practices and administrative tools in useful formats. Publication subject areas include, but are not limited to, child care and development, tobacco-use cessation, family resource centers, child health, family literacy, parental leadership, and early childhood education. In addition, toolkits have been developed to assist with grant preparation, fiscal leveraging, and organizational development.
- Regional workshops, conducted in small groups, focus on strategic planning, plan implementation, and organizational development topics.
- Teleconference collaboration showcases county lessons learned and information on best practices and features expert speakers in a convenient monthly meeting

<http://www.cchi.org>

Health and Safety Training for Licensed and License-Exempt Providers (All)

Resource and referral agencies get funds through a contract to arrange for or provide reimbursement to licensed center-based staff, licensed family child care providers, and license-exempt family child care and in-home providers. Reimbursement is for costs associated with completing health and safety

training, including pediatric cardiopulmonary resuscitation (CPR), first aid, prevention and control of communicable disease in child care settings, safe handling of food, nutrition, disaster preparedness and mitigation, and other health- and safety-related subjects.

Sharon Hawley, (916) 323-5089

Infant/Toddler

California Early Intervention Technical Assistance Network (CEITAN) (All)

CEITAN, a project of WestEd, provides training, technical assistance, and support to agencies and programs, such as the California Early Start program, in implementing early intervention services for infants and toddlers who are at risk of developmental disability and their families. CEITAN facilitates the implementation of a statewide comprehensive system of personnel development required by the Individuals with Disabilities Education Act (IDEA) to ensure that early intervention personnel are appropriately trained and qualified and have the knowledge and skills to provide quality early intervention services. Personnel development services include:

- The Early Start Training Institutes, which address early intervention competencies in four three-day core trainings
- Special Trainings and Forums, which include such topics as assessment and evaluation, natural environments, and family issues
- California Early Start Personnel
 Development Scholarship Fund, which
 provides training scholarships and
 grants to providers of early intervention services for college work,
 conference attendance, local training
 events, and local personnel development start-up efforts
- Consultant Network, which provides information, training, and technical assistance to regional centers, local educational agencies, and other agencies

• Community College Paraprofessional Preparation Project, which integrates early intervention competencies into child development programs

CEITAN is also studying other activities, including the Early Intervention Personnel Process, distance education, and supportive supervision and mentorship.

http://www.wested.org

Infant/Toddler Consortium (All)

The consortium is a dynamic collaboration of child care agencies and individuals (e.g., child care resource and referral staff, college instructors, and child care professionals) throughout the San Francisco Bay Area dedicated to advancing quality care for infants and toddlers. It organizes an annual conference at an affordable cost for diverse groups of people who care for infants and toddlers. The conference, which is the largest of its kind in California, offers workshops and other educational events in a variety of languages.

http://www.infanttoddlerconsortium.
org>

Program for Infant/Toddler Caregivers (PITC) (3-6)

This comprehensive multimedia training program for trainers of infant/toddler caregivers is presented in four separate modules, which cover the following topics: social—emotional development, quality group care, cognitive and language development, and cultural and family issues. Components of the program are as follows:

Trainer of Trainer Institutes. Participants who complete the modules and related course work are endorsed as PITC certified trainers. Participants receive copies of all curriculum guides, training manuals, and other print resource materials. They are also able to purchase the videos at discounted prices. Those receiving scholarships are required to conduct a minimum of 25 hours of training caregivers in their local area during the next two years, using the PITC materials.

Stipend for trainers with an infant/
toddler focus. Funds are allocated to
support the retention of trainers who
have completed state-funded trainer-oftrainer initiatives and to provide
community-based training to staff
working in child care and development
programs. The California Department
of Education provides stipends for
endorsed trainers primarily to conduct
on-site training sessions and to provide
technical assistance to enhance the
quality of infant/toddler programs.

Regional training coordinators. Funds are allocated for ten regional coordinators to support PITC-certified trainers in conducting training at the local level. These regional coordinators oversee the allocation of stipends for local trainers; arrange regular meetings with trainers to share new resource materials; coordinate outreach services to new and existing infant/toddler programs; and coordinate training at the PITC model training sites at five community colleges.

Contact information for the PITC regional coordinator and trainers is listed in the Regional Resource Directory.

Language and Literacy

Early Steps to Reading Success (ESRS) (3-4)

ESRS is a statewide early literacy collaborative project of the Reading Professional Development Institutes of the University of California, the California Association for the Education of Young Children, and the National Head Start Association (NHSA). Its goal is to provide California early childhood educators, caregivers, and parents with the knowledge and skills they need to foster early literacy in children from birth to five years of age. It is supported with state funds and a grant from the California Children and Families Commission. The two major components of ESRS are as follows:

1. *HeadsUp! Reading.* Under the auspices of NHSA and its partners,

(Continued on page 41)

(Continued from page 40)

this innovative 44-hour college course in literacy is delivered by satellite to locations throughout the country. In California sites are linked to the NHSA HeadsUp! Network to broadcast the courses to communities across the state. The project provides stipends, scholarships, and funds for substitutes for up to 2,000 participants who are working full time in programs serving children at greatest risk of school failure. Funds are also available to enrich early childhood settings with children's books and other instructional materials and to provide parents with children's books.

2. California Reading Professional Development Institutes. The institutes provide teams of early childhood educators from statefunded preschools and child development centers with intensive professional development in teaching crucial early literacy skills. Throughout the school year participating pre-K staff collaborate with other members of their school community to develop, implement, and assess action plans to help each child in their programs become a motivated and successful reader. Participants have opportunities to earn college credit or continuing education units. Stipends for institute participation are provided along with assessment and instructional materials on teaching reading as well as additional resource materials, including current research and textbooks.

http://www.caeyc.org

Training to Support Staff Working with Limited-English-Proficient (LEP) Children (5–6)

A series of two-day training-oftrainers sessions based on the California Department of Education's publication Assessing and Fostering the Development of a First and a Second Language in Early Childhood will be conducted throughout the state for staff working with LEP children. These sessions will target program coordinators and other supervisors serving preschool-aged children. Participants will receive a training manual, resource guides, videos, and support materials, which will facilitate additional training in their local communities.

Santa Cruz County Office of Education, (831) 479-5321

Mental Health

California Child Care Mental Health Project (All)

The goal of this mental health project is to strengthen the capacity of child care providers for providing quality child care to children with challenging behaviors by developing a model mental health service and support infrastructure to meet the special needs of children and families in the child care setting.

Through this project, the California Child Care Health Program (CCHP) will:

- Promote and maintain the health and well-being of children in child care.
- Create linkages and promote collaboration between mental health professonals and the child care community.
- Establish services to meet the identified needs of children with challenging behaviors, their families, and child care providers. The project focuses on eliminating barriers and promoting the inclusion in child care of those children with special behavioral and social needs. Three counties—Alameda, Ventura, and a rural county to be named—will be selected as pilot sites, and agreements of service will be developed with each county.

A general outline of services to be identified, developed, and established is as follows:

1. A mental health curriculum for training providers to:

- Understand early mental health and development.
- Establish and evaluate a screening process and train child care providers on how to identify symptomatic behaviors, when to seek mental health consultation, and how to access mental services.
- Ensure that mental health providers are able to assess children in their play environments.
- Counsel teachers on effective response to unacceptable behaviors and mental health interventions.
- Provide direct service.
- 2. A training curriculum for child care providers to help them understand:
 - How mental health intervention can help them provide quality child care
 - How to identify children who need intervention services warning signs to look for and observation and documentation techniques to apply
 - How to link with mental health services to establish appropriate intervention plans
 - How to work effectively with the mental health community
 - How to communicate with parents regarding mental health services for their children

(510) 281-7915 or http://www.childcarehealth.org

Infant-Preschool/Family Mental Health Initiative (All)

The initiative is a collaborative effort among eight county departments of mental health and their interagency community partners to develop early mental health and early intervention services for children from birth to five years of age and their families.

The project is funded through the California Department of Mental Health by a state-level grant from the California Proposition 10 Commission

(Continued on page 42)

(Continued from page 41)

for Children and Families. The initiative provides support, training, technical assistance, materials, and other resources to participating counties. It also assists in coordinating a statewide effort for personnel and program development. The initiative's primary goals and activities include expanding integrated services; developing resources; identifying effective screening and assessment measures and intervention approaches; providing community education; enhancing training for mental health professionals; and increasing interdisciplinary and interagency collaboration in evaluating outcomes for children, their families, and service providers.

(916) 492-9999

Early Childhood Mental Health Services Project (ECMHSP) (All)

The mental health consultants of ECMHSP train child care providers to develop their abilities and skills to:

- Offer healthy, safe, and developmentally appropriate and growthpromoting experiences for children in their care.
- Respond appropriately to the children's needs and to the multiple emotional, behavioral, developmental, and social challenges exhibited by the children in their care.
- Develop good and positive relationships with children in their care to alleviate difficulties that the children may be facing and to mitigate the effects of stressors on them, thus increasing the children's resiliency.
- Increase their awareness and understanding of the impact and importance of their interactions with children.

Laurel Kloomok, (415) 563-1041

Project Relationship (All)

Project Relationship is based on the premise that respectful and responsive interactions among staff, families, and children are necessary to establish and to sustain early childhood programs that nurture the children. The project

also holds that (1) each child care program is unique; (2) all behavior is communication; (3) adults are not interchangeable; and (4) the quality of relationships within the program is dependent on respect for individual differences and on positive response to individual needs. The project's basic tool, "Going Around the Circle," is a structured, relationship-based framework for problem solving among staff that helps them to work together to nurture each child, even the one with the most challenging behavior.

Materials used in the project include a training guide and video that illustrate the following components:

- Improving staff communication, which helps staff build authentic relationships to improve communication through mutual trust and commitment to the process
- Enhancing success for young children in group settings, which demonstrates the importance of increasing personalized interactions between staff and children as well as among staff members

• Enriching program
practices for children,
staff, and families,
which shows how developing
supportive routines and rituals can

enrich program practices

Although the project materials can be very useful in staff development, Project Relationship is aware that there are no "quick fixes" for building trust and relationships that prepare and support staff to work more effectively with children and families. Step by step, the project's trained facilitators build environments of trust and respect so that varying opinions, feelings, and levels of expertise can be shared in an authentic manner. This goal requires a long-term commitment.

Project Relationship's training services, ongoing support, technical assistance, and training materials are available from WestEd's Center for Prevention and Early Intervention.

E-mail: <ceitan@wested.org>

School Age

California School Age Consortium (CalSAC) (3-6)

CalSAC was founded to help programs provide quality out-of-school experiences for children and youths. Since 1982 CalSAC has been providing leadership and professional development training opportunities for staff of school-age care. It is the nation's oldest and largest statewide association for school-age care, representing over 7,000 professionals (see Professional Associations).

Each year CalSac conducts more than 30 conferences and specialized training workshops throughout the state. Since 1983 CalSac has hosted an annual statewide conference with networking opportunities and workshops for all levels of experience. CalSAC works in partnership with community colleges to promote developmentally appropriate education for after-school program staff. Training programs include:

 College Instructor's Curriculum Seminars. The seminars assist community colleges and continuing education programs in offering

(Continued on page 43)

(Continued from page 42)

training that is specific to the needs of staff in school-age care. The seminars are facilitated by veteran school-age care practitioners who combine their insight of the daily challenges and realities of the field with the school-age care theory outlined in the California Department of Education publication *Kids' Time: A School-Age Care Program Guide.*

During this innovative two-day training, participants:

- · Learn about current issues.
- Visit a variety of school-age care programs.
- Try out new activities and ideas to use in the classroom.
- Network with other college instructors teaching school-age care
- Receive tools for effective teaching of the components of a quality school-age care program to their students.

Participants receive two "ready-to-go" three-unit courses—School-Age Child Development and School-Age Care Curriculum—that include course outlines, assignments, handouts, discussion topics, and activities; Kids' Time: A School-Age Care Program Guide; the video version of Kids' Time; and National School-Age Care 'Alliance Standards for Quality School-Age Care.

2. Training for School-Age Program Professionals (Teachers and Administrators). The consortium conducts a series of training-of-trainers institutes throughout California, in which it uses the Department's Kids' Time program guide and Kids' Time video as the basis of the curriculum. The training activities include such topics as developmentally appropriate practices for school-age programs, behavior management techniques, a positive interpersonal environment, assessment of children's interests, partnership building with parents, links with the child's school, and community participation. Participants are provided a copy of the *Kids' Time* program guide and *Kids' Time* video for use in training in their local communities.

(415) 957-9775 or http://www.calsac.org

The California Department of Education provides stipends for trainers focusing on school-age and after-school care. The stipends support the retention of endorsed trainers who have completed the state-funded Kids' Time training-of-trainers institutes, enabling them to conduct community-based training for staff working in before- and after-school programs. The trainers also provide on-site consultation to enhance the quality of schoolage care and after-school programs.

Teacher Training

California Early Childhood Mentor Program (3–6)

The mentor program is conducted at approximately 70 community college campuses. The goal of the program is to support experienced early childhood education teachers and directors and to encourage them to remain in the field.

The program provides improved financial compensation and other benefits for child care and development teachers and program directors who are selected as mentors. Mentor applicants must complete a selfassessment of their classroom, and their program director must agree to the conditions of their participation. Mentors and director mentors are selected by a local selection committee convened by a participating community college. Mentors are paid a stipend for mentoring new practitioners and for supervising student teachers. The average stipend of a classroom mentor is estimated to be \$1,200 per year. A director mentor candidate undergoes a two-day training session and agrees to attend a subsequent director mentor seminar series. A director mentor is paid a stipend for guiding less experienced ("protégé") directors or site

supervisors and for giving them practical help.

The program enables more than 700 early childhood education students and director protégés to have alternative placements for practicum experiences and to benefit from direct program consultation. The program offers additional salary compensation to 535 mentor teachers and directors.

http://www.ecementor.org

Kaplan Company (3-6)

Kaplan was founded on the principle that children remain our future's brightest promise and has, therefore, focused its services on enhancing children's limitless capacity to learn, explore, and play. To promote healthy learning environments, Kaplan provides training in the areas of curriculum, classroom management and arrangement, assessment tools, integration of component objectives, parental involvement, referral to services for children with disabilities, guidelines for observation, children's behavior, and management of a family child care business.

E-mail: <serwin@kaplanco.com>

Prekindergarten Learning and Development Guidelines Training Program (3–6)

Prekindergarten Learning and Development Guidelines, a document developed by the California Department of Education, represents the best thinking on the kind of education that is appropriate for all children aged three through five, including children with disabilities and other special needs. It provides a foundation for educators in planning and maintaining high-quality programs in California's diverse preschool settings and communities. Although the guidelines are not mandatory, they are strongly recommended by the California Department of Education for all prekindergarten

The training program, a nine-hour distance learning course, is intended for all early childhood professionals

(Continued on page 44)

(Continued from page 43)

serving California's children, three through five years of age. The training is divided into three training sessions of three hours each. Each training session consists of two hours of interactive satellite broadcast and a one-hour small-group interaction led by a local facilitator. Participants are provided with additional support through Internet-based activities, interactive discussions, and feedback from the instate coordinating team. Administrators and their staff are encouraged to take the training together.

Priorities for acceptance into the training program are as follows:

- Staff of state-funded early care and education programs, including Head Start
- 2. Staff of federally funded Head Start programs
- Center-based and family child care providers, both proprietary and nonprofit
- 4. Families, college instructors and trainers, directors, principals, superintendents, and anyone involved in improving and maintaining high-quality, developmentally appropriate care and education for young children

(916) 486-7762 or E-mail: <*pre-k*@ *caeyc.org*>

Training Recipients of Temporary Assistance for Needy Families (TANF) as Child Care Teachers (1-2)

This successful two-year program trains TANF recipients to become child care and development teachers. During the first year of the training program, TANF recipients are selected and enrolled full time in community college course work. Participants are assigned mentor teachers to supervise their field placements and to provide them with support and tutorial assistance throughout the program. The second year of training includes 32 hours of paid employment per week and 40 units of continuing education—16 units in general education and 24 units in

early childhood education. At the end of the two-year training period, each successful TANF recipient qualifies for a Child Development Teacher Permit.

The California Department of Education proposes an expansion of the program from five to ten geographic areas in the state.

Alice Trathen, (916) 323-1312

Training and Support

Action Alliance for Children (AAC) (All)

The Alliance provides information about current trends and policy issues affecting children and their families in California. Through its award-winning bimonthly newsmagazine, Children's Advocate, AAC provides in-depth coverage of child care, education, welfare reform, health, and other issues critical to the development of all children. With more than 30,000 readers, articles in Spanish, and a statewide network of sources, the Children's Advocate is the voice for the growing advocacy movement for children in California. The agency's bimonthly newsletter, Master Calendar, highlights conferences, training, and resources for child development professionals and provides links to organizations working on children's issues. AAC also produces videos, reports, fact sheets, and other materials on topical issues affecting young children; operates an extensive resource library and referral information system; and develops an annual multicultural calendar.

Other services provided by AAC include:

- Outreach through its project "Building Communications for the Movement for Children and Families" by building one-on-one relationships and enabling service providers and child advocates across California to share ideas and frontline reports with the Children's Advocate
- Forums that bring together child advocates, policymakers, providers,

- educators, and concerned media to discuss vital policy concerns
- Technical and administrative support for new collaboratives to improve programs and resources for children

http://www.4children.org

Bridging Cultures (All)

Bridging Cultures is a WestEd project that supports teachers in acquiring and using cultural knowledge to increase the educational success of their students. To achieve this goal a group of professional researchers has collaborated with a group of teachers in an action research project since fall 1996. Participating teachers attend a series of three workshops conducted by the staff researchers, after which they become researchers in their own classrooms and schools where immigrant Latino students constitute the majority. The teachers' explorations are guided by a cultural framework based on the values associated with individualism (the orientation of the dominant U.S. culture) and collectivism (the orientation of most immigrant cultures, American Indians, Alaska Natives, and others) and their influence on student behavior. Since 1998 the project has made over 90 presentations to teachers, administrators, teacher educators, researchers, and paraprofessionals.

Project strands are as follows:

- Developing workshops for a core group of teachers on *individualism* and *collectivism* and their implications for child rearing and schooling
- Documenting changes in the thinking and instructional practices of these teachers
- Supporting core teachers in developing their own skills as researchers
- Teaching core teachers to learn about cultures through ethnography
- Collaborating with core teachers to design and to provide professional development for other educators

(Continued on page 45)

(Continued from page 44)

- Teaching preservice teachers, new teachers, and school counselors about the Bridging Cultures framework
- Publishing and disseminating materials on what has been learned
 http://www.wested.org

California Child Care Resource and Referral Network (All)

The network coordinates services that assist local resource and referral (R&R) agencies in providing guidance to parents, child care providers, policymakers, and business and community leaders in each county. It develops innovative programs that are implemented by local R&R agencies. The network also works closely with elected officials and state and local leaders to ensure a broad-based understanding of child care issues. Working with local, regional, and statewide agencies, the network seeks to maintain, improve, and increase the supply of child care services through special programs that promote child care as a profession; produces materials to educate parents on good child care; trains child care providers in improving their services; and trains local agencies to recruit and prepare men and women for jobs in the field of child

Local R&R agencies are located in every county in California. Some large counties have more than one agency, and a few small counties may share an agency with a neighboring county. Over the last two decades, R&R services have evolved from a grassroots effort to help parents find child care to a well-developed system that supports parents, providers, and local communities in finding, planning for, and providing affordable, quality child care. The state, through the California Department of Education, Child Development Division, has supported these efforts since 1976.

R&R agencies provide the following services:

- Help parents find child care that best meets their family needs.
- Document parents' requests for child care services.
- Maintain comprehensive databases of child care providers in their communities, including licensed family child care homes and child care centers.
- Track providers' licensing status, the languages they speak, the age groups they serve, the schedules they offer, and the number of spaces available in centers or family child care homes.

The committee's intent is to encourage long-range child development policies and programs that are developmentally appropriate and socially advanced.

- Work with providers to improve and maintain the quality of child care and to increase the supply of child care in each county.
- Provide training and other services that help providers stay in business.
- Educate local communities and leaders to understand child care issues and to address child care needs effectively.

Contact information for local R&R agencies is listed in the County Resource Directory.

http://www.rrnetwork.org

California Child Development Policy Advisory Committee (CDPAC) (3–6)

The advisory committee acts as a citizens' review board. It is composed of representatives of five state departments and appointed members—parents, community members, and family child care and child center operators. CDPAC operates through two forums: (1) nine full committee meetings that are held annually and are

open to the public; and (2) subcommittee and workgroup meetings that are open to public participation. Since its inception, the primary role of CDPAC has been to make public policy recommendations concerning child care and development to the Governor, the State Legislature, and relevant state departments. The committee's intent is to encourage long-range child development policies and programs that are developmentally appropriate and socially advanced.

CDPAC has a contract with CDE to provide guidance for local child care planning council activities. The councils are appointed by county boards of supervisors and county superintendents of schools pursuant to Education Code Section 8499.5. The councils assess the need for child care and development services and identify gaps in the supply of existing licensed center-based and family child care programs. Based on the information obtained through a periodic assessment of needs, the local planning councils establish priorities for the use of grant funds to address the child care needs of the community, including the expansion of child care services and training of child care staff and providers. These priorities typically specify the ages of the children, the target populations, the special needs or circumstances of families, and the geographic areas of service. Each year, CDPAC holds a statewide local planning council conference.

Contact information for local child care planning councils is listed in the County Resource Directory.

<http://www.cdpac.ca.gov>

California Children and Families Commission (Prop 10) (All)

The California Children and Families Act of 1998 (Proposition 10) established the California Children and Families Commission to provide a comprehensive, integrated system of early childhood development services for all California children from the prenatal period up to five years of age. Services are provided in each county

(Continued on page 46)

and at the state level and include various training and professional growth opportunities for early care and education professionals.

Contact information for each of the 58 county commissions is listed in the County Resource Directory.

http://www.ccf.ca.gov

California Virtual Campus Professional Development Center (CVCPDC) (All)

The center is a joint Web site project of El Camino and Santa Monica Colleges created under the auspices of the Chancellor's Office for the California Community Colleges. The CVC catalog of distance-education programs and courses continues the work of its predecessor, the California Virtual University Web site, in disseminating information on distance-learning opportunities at California institutions of higher education:

- Information Exchange encourages lively, ongoing discussions related to a variety of issues in the early care and education profession. Participants are free to contribute examples of how technology is used in teaching and learning; to post upcoming events and professional development opportunities; and to share interesting Web sites, ideas, and questions.
- Discussion Board allows participants to open discussions with child development and early child education faculty and staff. Special topics of interest are online teaching, teaching with the use of technology such as Power Point, and the use of Internet resources during lectures.

<http://pdc/cuc.edu/ac/acdev>

Child Development Teacher and Supervisor Grant Program (3–6)

Through grants administered by the California Student Aid Commission, this program provides assistance to students for college course work leading to the attainment of a child development permit in the following

levels: teacher, master teacher, supervisor, or program director. Participants in this program are selected on the basis of financial need and academic achievement. As a condition of the grant, participants must commit to working one full year in a licensed child care center for every year they receive a grant. Commitments will be honored for students approved prior to July 1, 1997, under the pre-existing teacher loan assumption program.

Catalina Mistler, California Student Aid Commission, (916) 526-7976

Child Development Training Consortium (CDTC) (All)

The consortium is a statewide program that addresses the critical shortage of qualified child care workers in the state of California. It also supports the professional growth and development of those already working in the field. Funding for all program services is limited. The five main program services provided to eligible participants are:

- Administrator Institutes. CDTC sponsors a series of two- and threeday institutes throughout the state for the professional growth and development of program directors and site supervisors.
- Career Incentive Grant. Grants
 reimburse students for expenses
 incurred in taking college courses
 leading to a child development
 permit. The program serves individuals who attend a nonconsortium
 community college or a four-year
 college or university. Applications
 are processed on a first come, first
 served basis.
- Child Development Permit Stipends.
 CDTC pays all the application processing fees levied by the California Commission on Teacher Credentialing for child development permits, including those of program directors. In addition to the fees for first-time permits, funds are available to upgrade and renew all permits. If funds run low, the

- priority will be in the following order: first-time permits, upgrades, and, finally, renewals. Within each application category, the priority will be for lower-level permits.
- Community College Reimbursement Program. This program reimburses participants for specific educational expenses at 96 community colleges across California. It is available through the CDTC campus coordinator designated at each college.

Professional Growth Advisor Project.
 Through 16 regional facilitators
 CDTC provides training and support to new and previously trained professional growth advisors. A registry of available advisors is maintained and disseminated and is available through the CDTC Web site.

Contact information for the 16 regional facilitators is listed in the Regional Resource Directory at the end of this document.

(209) 572-6080 or http://www.childdevelopment.org

(Continued on page 47)

(Continued from page 46)

California Commission on Teacher Credentialing Pilot Program (All)

The commission's two-year pilot program for approving Alternative Education course work and Early Childhood Education programs—courses of study toward the child development permits—is scheduled to run through June 2001. The function of this unprecedented pilot program is twofold:

- To examine and to validate course work offered through three organizations that are not regionally accredited; and
- To approve Early Childhood Education programs offered through eight colleges and universities that are regionally accredited by the Western Association of Schools and Colleges (WASC).

Participants of the Alternative Education program, who may use no more than 12 semester units of course work in the program, may apply for a permit directly to the commission or through the Child Development Training Consortium. The commission will issue a permit to participants who take courses through a WASC-approved college or university on the recommendation of their institution.

Through the pilot program the commission establishes a cooperative relationship among alternative education agencies and organizations and community colleges. The program also enhances relationships with the commission and four-year institutions.

Further implementation of the program depends on its success and whether the commission elects to continue it.

Pilot sites for the Alternative Education course work are as follows:

- Development Associates, Inc., Walnut Creek and San Diego
- Montessori Western Teacher Training Program, Garden Grove
- San Francisco Bay Area Montessori Teacher Education Center, San Leandro

Pilot sites for the Early Childhood Education programs are as follows:

- American River College, Sacramento
- Grossmont College, El Cajon
- Modesto Junior College, Modesto
- Moorpark College, Moorpark
- Mt. San Antonio College, Walnut Creek
- Pacific Oaks College, Pasadena
- University of La Verne, La Verne
- University of California Riverside Extension, Riverside
 (916) 445-3223

Development Associates (All)

Development Associates, Inc., in collaboration with the Region IX Head Start Association, state Head Start associations, and state Head Start Collaboration Offices, operates the Region IX Head Start Quality Improvement Center (HSQIC), which serves Head Start grantees and agencies in California. HSQIC objectives are to:

- Provide cost-effective and expeditious training and technical assistance to child care workers throughout the widely spread Head Start community.
- Build on established partnering arrangements with academic institutions and local and state health services.
- Assist in technology planning and assessment.
- Maintain a continuous improvement process for Head Start agencies.

HSQIC provides information services that include a Web site, a faxon-demand system (QIC FAX9), and satellite equipment with teleconferencing capabilities, making possible a wide range of training opportunities. In addition, Pacific Oaks College has a third party agreement with HSQIC to offer accredited continuing education units as well as courses leading to bachelor of arts and master of arts

degrees in early childhood and human development to providers of Head Start, Early Head Start, and child care services in Region IX, which includes California, Hawaii, Nevada, Arizona, and the Outer-Pacific islands.

<http://www.devassoc.com>

Local Program Quality Consortia Grants (All)

A network of more than 53 local child development program quality consortia throughout California provides an opportunity for child care workers to share successful child development program practices with each other and to assist peers in implementing these practices. The members of the local program quality consortia are employed in subsidized (e.g., Head Start) or nonsubsidized child care and development programs. Consortia funds, combined with other resources, enhance the quality of professional development activities and increase the availability of local workshops and conferences to consortia members and, often, to the public.

Contact information is listed in the County Resource Directory.

Regional Resource Centers to Develop Capacity of Local Agencies in Underserved Areas (5–6)

The legislative intent of *Education Code* Section 8269 is to "... promote equal access to child development services across the state." In keeping with this intent, ten regional community-based organizations, identified through the Request for Proposal (RFP) process, provide training and technical assistance to local agencies in underserved communities to enable those agencies to compete successfully for funds and to operate quality child care and development programs.

Contact information is listed in the Regional Resource Directory.

Web Resources

The following Web sites on early education, health, research, and other topics either have recently come to our attention or are so good that we have decided to list them again. The listing is highly arbitrary and, because of the ever-changing nature of the Internet, some sites may no longer be available. We invite you to visit also the "Head Start Collaboration" page at the California Head Start—State Collaboration Office (CHSSCO) Web site http://www.cde.ca.gov.

Advocacy/Children-Family Issues

The Annie E. Casey Foundation works to build better futures for disadvantaged children and families. The foundation's Web site strives to provide the best available data and analysis on issues affecting families as well as to disseminate grant information http://www.aecf.org.

Developmental Disabilities

The Federal Interagency Coordinating Council Web site covers federal activities related to young children with disabilities and infants and toddlers who are at risk of developing delays—children served under the Individuals with Disabilities Education Act. The site has a wealth of information for parents, caregivers, special educators, and others http://www.fed-icc.org.

The Connections Project trains and supports teachers in implementing developmentally appropriate inclusive classroom practices. Find out more about the project at its Web site http://www.sonoma.edu/cihs/connect.html>.

Connect for Kids: Guidance for Grown-ups features on its Web site news items regarding various events affecting children, such as celebrations across the country of the importance of foster care; the introduction of a new bill to ensure all children have a chance to grow up safe, healthy, and educated; and information on uninsured children http://www.connectforkids.org.

Early Education Research

The California Budget Project engages in independent analysis of state fiscal and economic policy issues as well as public education with the goal of improving public policies affecting the economic and social well-being of low- and middle-income Californians. The Web site currently features a report entitled "California's Subsidized Child Care Center Funding Crisis" http://www.cbp.org.

Childtrends is a research organization that studies children, youth, and family issues through research, data collection, and data analysis. Its Web site features its new "What Works" table, which presents proven strategies and "best bets" for promoting early school readiness and early literacy. Reports and briefs are available, including "Beyond the Census: New Fact Sheet Highlights Trends Specific to Hispanic Children, Youth, and Families," at the Web site http://www.childtrends.org.

The National Academy Press publishes reports issued by the National Research Council, the National Academy of Sciences, and others. Some publications, such as Early Childhood Development and Learning: New Knowledge and Policy, may be downloaded at no cost at the Web site http://www.nap.edu.

Health and Safety

The Consumer Product Safety Commission Web site lists unsafe and recalled products. To receive an update whenever there is a product recall, register your e-mail address at the site http://www.cpsc.gov>.

The National Highway Traffic Safety Administration Web site now includes information for parents, caregivers, and other interested persons about the correct use and installation of child safety seats http://www.nhtsa.gov>.

Head Start Resources

The Head Start Information and Publication Center has a number of documents that are of interest to the early education community. Memorandums and program instructions provide tools, models, and techniques for use in program development and add detail to policy requirements. The center also updates Head Start performance standards on its Web site http://www.headstartinfo.org.

The Region IX Head Start Quality Improvement Center (Development Associates, Inc.) Web site has an extensive listing of the Web sites of various organizations and services related to early care and education. The Web site also lists the addresses of California Head Start grantees and delegate agencies http://www.devassoc.com/>.

CALIFORNIA HEAD START-STATE COLLABORATION OFFICE

Bridges is produced by the California Head Start-State Collaboration Office (CHSSCO), which was created to promote partnerships between Head Start and the larger child care and development community at the state and local levels. Bridges is funded by the U.S. Department of Health and Human Services, Administration for Children and Families, and the California Department of Education, Child Development Division. The opinions expressed are those of the authors and not necessarily those of the Department. CHSSCO is located in the Child Development Division, 560 J Street, Suite 220, Sacramento, CA 95814.

Michael Jett. Director Child Development Division (916) 322-6233

Michael Silver, Administrator Policy, Program, and Legislation Development Unit Director, CHSSCO (916) 322-6233

Michael Zito, Coordinator CHSSCO (916) 323-9727
